EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven M. Rabin on December 27, 2005.

The application has been amended as follows:
in the claims:

claim 6, line 19 – added --of the guiding plate-- after the first occurrence of "hole".

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the cross hatching of the guide plate 10 and the locking plate 20 is incorrect in Figures 2, 4A-4F, 6, and 8A-8F. It was agreed that the cross hatching of the guide plate be changed to plastic according to page 6, line 9 of the specification, and the cross hatching of the locking plate be changed to metal according to page 6, line 13 of the specification. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.
